DETAILED ACTION

1. This Office Action is taken in response to Applicants' Amendments and Remarks filed on May 10, 2006 regarding Application 10,672,328 filed on September 26, 2003.

2. Claims 2-3 and 10-11 have been cancelled.

Claims 1, 4-9 and 12-14 are pending for examination.

3. ***Response to Amendments and Remarks***

As to Double Patenting Rejections and Terminal Disclaimer.

The terminal disclaimer filed on May 10, 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US patent **6,629,253** has been reviewed and is accepted. The terminal disclaimer has been recorded.

As a result of the acceptance of the terminal disclaimer, double patenting rejections of claims 1, 4-9 and 12-14 as being anticipated by US patent **6,629,253** as stated in the previous Office Action have been withdrawn.

Allowable Subject Matter

4. It was indicated in the previous Office Action that claims 1, 4-9 and 12-14 would be allowable if the corresponding double patenting rejections could be overcome. As a result of the acceptance of the terminal disclaimer, double patenting rejections of claims 1, 4-9 and 12-14 as being anticipated by US patent **6,629,253** as stated in the previous Office Action have been withdrawn. Therefore, claims 1, 4-9 and 12-14 become allowable.

Reasons for Allowable

5. The following is an Examiner's statement of reasons for allowance:

Independent claims 1 and 9 have been amended with new limitation of **"a timer to insert a delay time between consecutive fragment requests for fragments from different planes."**

This particular limitation, combined with other limitations recited in claims 1 and 9, makes this invention unique and distinguishes it from the mentioned references.

The patentability of Applicants' invention was examined and evaluated against the prior art listed below.

- Meinerth et al., (US 6,199,149), "Overlay Counter for Accelerated Graphic Port."
- Pfeiffer et al., (US 5,146,592), "High Speed Image Processing Computer with Overlapping Windows-DIV."
- Ichikawa et al., (US 5,440,680), "Image Display Controller Having a Common Memory for Storage of Image Overlay Data and Window Identification Data."

However, none of the prior art of the record teaches or suggests, independently or in combination, the specific features, as recited in claims 1 and 9.

Conclusion

6. Claims 1, 4-9 and 12-14 are allowed.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sheng-Jen Tsai whose telephone number is 571-272-4244. The examiner can normally be reached on 8:30 - 5:00.
